Office Action Summary

Serial No. 10/601,788

-2-

Art Unit 1752

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-4, drawn to compound, classified in Class 548, subclass 307.1.

II. Claims 5-7, drawn to silver halide photographic material, classified in Class 430, subclass 523.

The inventions are distinct, each from the other because of the following reasons:

The compounds of Group I need not be used in the silver halide photographic elements of Group II but may be used, for example, to provide latex protective coatings to diazo or color prints or packaging material; to provide subbing layers for ink jet or dye receptor sheets or photoresist elements or as a surfactant in paints.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Any inquiry concerning this communication should be directed to Mr. Schilling at telephone number (703) 308-4403.
